

Rumble Clarifications

Pro Stock V8 Rumble

This heat will follow the same rule sheet as the Pro Stock V8 class with these few modifications:

- No imperials
- You will be allowed ONE of these two options for reinforcement:
- Plate outside of the front frame rail from A-arm forward OR
- You may run kickers from the dash bar to frame behind the A-arms.
- You will be allowed a 24" wide tank protector. This can touch the sheet metal.

Pro Compact Rumble

This heat will follow the same rule sheet as the Pro Compact class with these few modifications:

- You will be allowed 14" of max 4" x 3/8" thick plate on the outside of the FRAME RAIL only, not the sub frame.
- The 6" rule still applies for bumper mounting.
- The 14" of plate will be measured from the back of the bumper
- You do **NOT** get 6" to mount your bumper then add 14" of plate (creating 20")
